

STAINLESS STEEL Gen 5/6 Sea Water Pump - Lifetime Series

STAINLESS STEEL Gen 5/6 Sea Water Pump - Lifetime Series

Model : 625-4118

Manufacturer : Hardin Marine

Hardin Marine has once used their racing support and heritage to develop a superior sea pump replacement option for the MerCruiser Gen 5/6 application that requires the mechanical fuel pump mounting provision. This pump uses a 316L heat treated stainless steel snout with a 17-4 hardened pump shaft and high speed roller bearings to provide the ultimate sea pump foundation for years of service. This pump is available in two (2) versions, this one is the "Lifetime Series" version (#625-4118) which employs Hardin's all-stainless steel impeller housing with OEM Mercruiser impeller. The other is the "Standard Duty" unit (#625-4112) using a OEM style plastic impeller housing and impeller. The pumps are assembled and tested right here in the USA and are the best money can buy.
